GT-7012-PA 平面磨耗試驗機 Rub Fastness Tester

適用於汽車座椅皮革等有色材料，測試摩擦後表面脫色程度。以規定壓力、行程及速度往復摩擦試樣，通過白棉布污染情況判定性能。

The GT-7012-PA is designed for determining the colorfastness to rubbing of colored materials used in automotive upholstery. The specimen is subjected to reciprocal rubbing under the specified conditions of load, stroke, and speed. The colorfastness performance is evaluated based on the degree of staining on a white cotton cloth.

測試荷重 Test load	500g、1000g
摩擦行程 Rubbing stroke	140mm
摩擦頭曲面半徑 Rubbing head radius	10mm
摩擦速度 Rubbing speed	60cpm
計數 Counter	0~99、999、999次
體積 Dimensions	70x70x63cm (WxDxH)
電源 Power	1φ AC 220V 50/60Hz (或依國別而定 or specify)
