### GT-7071-ISO 鞋材水份吸收及脫離試驗機 Insole / Insock Absorption And Desorption

GB/T 20991-2007、GB/T 3903.33-2019、EN ISO 20344-2021、EN 12746:2000、  
ISO 22649:2003、ISO 22649:2016

適用於測試鞋內底及內襯的吸水性與水解吸附性。將試樣放置於濕潤的底板上，讓其在一定的壓力下接受重複的撓曲(類似行走期間，一鞋子的內底所經受的撓曲)，測試試件的水吸收性和水解吸附性。

The GT-7071-ISO is specifically designed to assess the water absorption and desorption of insole and insock. The test specimen, positioned on a wet base, is subjected to repeated flexing under a specific pressure to simulate conditions experienced during walking, allowing operators to assess the specimen's water absorption and desorption properties.
