GT-7054-A 扭轉試驗機 Cord Torsion Tester

CNS 941-104、ASTM D4975-25、GB/T 239.1-2023、GB/T 239.2-2023

專門試驗各種金屬線之扭斷強度及漆包線之漆膜耐扭次數。
將試樣兩端夾緊一端固定不動，另一端360°連續旋轉或180°
往復扭轉，至試樣扭斷或漆包線之漆膜脫落，露出導體，記
錄其耐扭轉數。

The GT-7054-A is specifically designed to assess the torsional strength of various metallic wires and twist resistance of enameled wire coating. One end of the specimen is fixed, while the other end is rotated continuously 360° or reciprocally 180° until the specimen fails or the enamel coating peels off. The number of twists is recorded.

夾具作動 Grip type	手動式夾具 Manual
夾具間距 Space between grips	0~500mm可調 adjustable
扭轉速度 Torsion speed	40~90rpm 或 90~180rpm (擇一 select one)
適用試樣直徑範圍 Specimen diameter	0~10mm
計數器 Counter	0~999.9(精確到0.1轉 accurate to 0.1 revolution)
轉動方向 Rotation direction	正/反轉可調 Forward/reverse (adjustable)
電源 Power	1φ AC220V 50/60HZ(依國別或指定 or specify)
